- Frontend software engineering
- Product management
- MIT engineering degree

Skilled in Javascript ES5+ React Redux Node CSS HTML Git Docker AWS Storybook Angular Backbone Mocha SQL GraphQL HTTPS Scrum Jira Sketch

Senior Frontend Engineer, AppDirect San Francisco June 2016 - Nov 2018
- Development of a React/Redux web application for real-time business intelligence and data visualization.
- Built FE for multi-factor authentication flows as lead frontend developer on Identity & Access Management engineering team.
- Decreased UX friction and introduced new features in core user assignment flows by eliminating technical debt and authoring modern SPAs. Contributed to ideation and design of new features.
- Squashed bugs and implemented testing frameworks to ensure deployment of high quality code. On-call incident response.

Technical Lead, Envirocrete LLC   Chandler, AZ 2009 - 2016
- Built and maintained online presence – catalog, store, analytics, SEO, AdWords.
- Established stone veneer manufacturing company. Formulated and developed four product lines. Sourced raw materials from US, Mexico & China. Set up 10k sq ft production facility. Established efficient production workflow for employees.

Cofounder, Rezver Inc   Phoenix, AZ 2007 - 2009
- Set up pilot supplement production facility and online presence.
- Translated MIT Biotechnology lab research into market ready products with extensive quality control testing. Authored provisional patent application.

B.S., Massachusetts Institute of Technology   Cambridge, MA 2007
- Managed complex research projects in bioengineering labs. Authored programs for data collection and analysis, saving researchers several hundred hours.
- Rigorous engineering coursework. Bachelor of Science degree in Materials Science & Engineering with additional concentration in Economics.
